Développement de projet Demo Non planifié

Steps to reproduce:

1. Open the login form.
2. Enter numeric input (e.g., "12345") into the Name field.
3. Enter a valid email.
4. Submit the form.

Expected result:

- The system should block non-alphabetic characters in the Name field.

Actual result:

- The form is accepted, and login proceeds without validation error.

Environment:

- Browser: Chrome 125.0
- OS: Windows 10

Type: Bug

Priority: High
